

DRAFT MIDDLE BLACKFOOT-NEVADA CREEK TOTAL MAXIMUM DAILY LOADS AND WATER QUALITY IMPROVEMENT PLAN

Sediment, Nutrient, Trace Metal and Temperature TMDLs

Public Comment Draft
December 10, 2007

Table of Contents

Executive Summary	1
Section 1.0 Document Organization and Content	11
Section 2.0 Regulatory Framework	15
2.1 TMDL Development Requirements	15
2.2 Water Bodies and Pollutants of Concern	16
2.3 Listing History and Impairment Justifications (Middle Blackfoot TPA)	24
2.4 Listing History and Impairment Justifications (Nevada Creek TPA)	34
2.5 Applicable Water Quality Standards	46
2.5.1 Classification and Beneficial Uses.....	47
2.5.2 Standards.....	48
2.5.3 Reference Condition Approach for Narrative Standards	51
2.5.4 Developing Parameter Values or Ranges for Reference Condition.....	53
Section 3.0 Watershed Characterization	57
3.1 Location and Description of the Watershed.....	57
3.2 Geology.....	57
3.3 Soils.....	58
3.4 Climate	59
3.5 Hydrology	60
3.6 Stream Geomorphology	63
3.7 Vegetation	65
3.8 Land Ownership.....	66
3.9 Land Uses.....	67
3.10 Fisheries and Aquatic Life	68
Section 4.0 TMDL Assessment Projects and Data Sources	73
4.1 Phase 1 TMDL Assessment	73
4.2 Base Parameter Field Assessment and Data Analysis	73
4.3 Bank Erosion Inventory	74
4.3.1 Data Collection	75
4.3.2 Data Analysis	75
4.4 Roads Assessment.....	76
4.5 Metals Assessment.....	76
4.5.1 DEQ Assessment Data.....	77
4.5.2 USGS Data.....	77
4.5.3 Supplemental Metals Data (Hydrometrics)	77
4.6 SWAT Modeling.....	78
4.7 Temperature Assessment and Modeling	78
4.8 Data Source Summary	79
Section 5.0 Sediment and Habitat Impairments	83
5.1 Sediment and Habitat Water Quality Goals and Indicators	83
5.1.1 Sediment and Habitat Targets and Indicators	84
5.1.2 Departure Assessment.....	103
5.1.3 Water Quality Impairment Status Assessment	103
5.2 Water Quality Impairment Status: Nevada Creek Planning Area	103
5.2.1 Washington Creek.....	104
5.2.2 Jefferson Creek	109

5.2.3 Gallagher Creek	114
5.2.4 Buffalo Gulch.....	116
5.2.5 Braziel Creek	118
5.2.6 Nevada Creek.....	121
5.2.7 Nevada Spring Creek	127
5.2.8 Black Bear Creek	130
5.2.9 Douglas Creek.....	132
5.2.10 Cottonwood Creek	136
5.2.11 McElwain Creek	138
5.2.12 Murray Creek.....	139
5.3 Water Quality Impairment Status: Middle Blackfoot Planning Area.....	141
5.3.1 Blackfoot River (Nevada to Belmont)	141
5.3.2 Yourname Creek	145
5.3.3 Wales Creek	147
5.3.4 Frazier Creek.....	148
5.3.5 Ward Creek	151
5.3.6 Kleinschmidt Creek	153
5.3.7 Rock Creek.....	155
5.3.8 North Fork Blackfoot River	159
5.3.9 Warren Creek	161
5.3.10 Monture Creek	164
5.3.11 Chamberlain Creek	167
5.3.12 Cottonwood Creek	168
5.3.13 Richmond Creek	169
5.3.14 West Fork Clearwater River	170
5.3.15 Deer Creek	171
5.3.16 Buck Creek.....	173
5.3.17 Blanchard Cr.	174
5.4 Sediment and Habitat Impairment Summary.....	175
5.5 Sediment Source Assessment	176
5.5.1 Hillslope Erosion	177
5.5.2 Streambank Erosion	180
5.5.3 Sediment from Road Crossings	185
5.5.4 Sediment from Culvert Failure	188
5.5.5 Sediment Source Summary	188
Section 6.0 metals impairments	189
6.1 Metals Water Quality Goals.....	189
6.2 Water Quality Impairment Status	190
6.2.1 Additional Metals Water Quality Standard Exceedences	195
6.2.2 Stream Bed Sediment Metals.....	196
6.2.3 Metals TMDL Summary	196
6.3 Metals Source Assessment.....	197
6.4 Metals Loading	200
6.5 The Metals-Suspended Solids Relationship.....	202
Section 7.0 Nutrient Impairments	203
7.1 Interpretation of Montana's Narrative Nutrient Standards	204

7.1.1 Lower Nevada Creek and the Blackfoot River	204
7.1.2 Upper Nevada Creek and Tributaries	205
7.1.3 Nevada Creek Reservoir	206
7.2 Available Water Quality Data for the Nutrient Impaired Waters	207
7.2.1 Blackfoot River and Nevada Creek	208
7.2.2 Tributaries to the Blackfoot River and Nevada Creek.....	210
7.2.3 Nevada Creek Reservoir	215
7.3 Preliminary Nutrient Source Assessment	217
Section 8.0 Temperature Impairments.....	225
8.1 Temperature Target Development	225
8.1.1 Existing Data Analysis.....	226
8.1.2 Model Construction and Calibration.....	226
8.1.3 Temperature Source Assessment	226
8.1.4 Determination of Naturally Occurring Temperatures.....	230
8.1.5 Temperature Target Determinations	231
8.1.6 Adaptive Management for Temperature Targets	234
8.2 Water Quality Impairment Status	234
8.2.1 Nevada Creek Planning Area.....	234
8.2.2 Middle Blackfoot Planning Area	260
Section 9.0 Pollutant loads and allocations.....	279
9.1 Sediment Loading	279
9.1.1 Hillslope Erosion Loading Estimates and Adjustments.....	279
9.1.2 Stream bank Erosion Loading.....	280
9.1.3 Road Crossing Sediment Loading	282
9.1.5 Sediment Loading Summary.....	285
9.1.6 Sediment TMDLs.....	285
9.1.7 Sediment Allocations	289
9.1.8 Daily Loads and Allocations.....	293
9.1.8 Margin of Safety and Seasonality for Sediment TMDLs	294
9.2 Metals TMDLs and Allocations.....	295
9.2.1 Approach to Metals Allocations	296
9.2.2 Lower Washington Creek	297
9.2.3 Lower Jefferson Creek.....	299
9.2.4 Upper Nevada Creek	301
9.2.5 Seasonality and Margin of Safety for Metals TMDLs.....	304
9.3 Nutrient TMDLs, Allocations, and Margin of Safety	305
9.3.1 Total Phosphorus	306
9.3.2 Total Nitrogen.....	312
9.3.3 Nutrient Allocations.....	318
9.3.4 Uncertainty and Margin of Safety.....	318
9.3.5 Adaptive Management Strategy for the Nutrient Targets, TMDLs and Allocations ..	318
9.4 Temperature TMDLs and Allocations	320
9.4.1 Temperature Allocation and TMDL for Upper Nevada Creek.....	322
9.4.2 Temperature Allocation and TMDLs for Lower Nevada Creek.....	323
9.4.3 Temperature Allocation and TMDL for Cottonwood and Murray Creeks.....	324
9.4.4 Temperature Allocation and TMDL for Upper Douglas Creek.....	324

9.4.5 Temperature Allocation and TMDL for Lower Douglas Creek	325
9.4.6 Temperature Allocation and TMDL for Kleinscmidt Creek.	326
9.4.7 Temperature Impairment to the Blackfoot River Main Stem (Nevada Creek to Monture Creek).....	327
9.4.8 Temperature Impairment to the Blackfoot River Main Stem (Monture Creek to the Clearwater River).....	328
9.5 Seasonality, Uncertainty and Margin of Safety for Temperature TMDLs	328
Section 10.0 Water Quality Restoration Implementation and Monitoring Plan	331
10.1 Introduction.....	331
10.2 Management Recommendations	332
10.2.1 Middle Blackfoot Planning Area	332
10.2.2 Nevada Creek Planning Area.....	383
10.3 Implementation Strategy	446
10.3.1 Key Elements and Approaches	446
10.3.2 Partners and Priorities	447
10.3.3 Water Quality Restoration Projects	450
10.3.4 Funding	453
10.4 Evaluating Success.....	458
10.4.1 Tracking Implementation.....	458
10.4.2 Monitoring	458
10.4.3 Adaptive Management	461

Figure 8-15. Simulated Mean and Maximum Temperature with Change in Bankline Vegetation for Lower Nevada Creek.....	247
Figure 8-16. Continuous Water Temperature, Cottonwood Creek above Pole Creek, 2000.....	249
Figure 8-17. Continuous Water Temperature, Cottonwood Creek above Douglas Creek (Ovando-Helmville Road), 2000.....	250
Figure 8-18. Upstream To Downstream Temperature Variation, Cottonwood Creek, 2000	250
Figure 8-19. Average Daily Water Temperature, Cottonwood Creek, 2000.....	251
Figure 8-20. Simulated Mean and Maximum Temperature with Change in Bankline Vegetation for Cottonwood Creek.....	252
Figure 8-21. Continuous Water Temperature, Douglas Creek above the Reservoirs, 1998.....	253
Figure 8-22. Continuous Water Temperature, Douglas Creek below the Reservoirs, 1998	254
Figure 8-23. Average Daily Water Temperature, Upper Douglas Creek, 1998	254
Figure 8-24. Continuous Water Temperature, Douglas Creek below Chimney Creek, 2000	257
Figure 8-25. Continuous Water Temperature, Douglas Creek above Cottonwood Creek (Ovando-Helmville Road), 2000.....	258
Figure 8-26. Average Daily Temperatures, Lower Douglas Creek, 2000	258
Figure 8-27. Simulated mean and maximum temperature with change in bankline vegetation for lower Douglas Creek.....	259
Figure 8-28. Continuous water temperature, Kleinschmidt Creek, 2001	261
Figure 8-29. Continuous water temperature, Kleinschmidt Creek, 2004	262
Figure 8-30. Average daily water temperature, Kleinschmidt Creek near Rock Creek, 2001 and 2004.....	262
Figure 8-31. Temperature variation between years 2001 and 2004, Kleinschmidt Creek	263
Figure 8-32. Simulated mean and maximum temperature with change in stream bank vegetation, Kleinschmidt Creek above Highway 200	264
Figure 8-33. Simulated mean and maximum temperature with change in bankline vegetation for Kleinschmidt Creek above Rock Creek.....	265
Figure 8-34. Continuous water temperature, Blackfoot River at Cutoff Bridge, 2000	267
Figure 8-35. Continuous water temperature, lower Nevada Creek at the mouth, 2000	268
Figure 8-36. Continuous water temperature, Blackfoot River at Raymond Bridge, 2000	268
Figure 8-37. Continuous water temperature, North Fork Blackfoot River, 2000.....	269
Figure 8-38. Continuous water temperature, Monture Creek, 1999	269
Figure 8-39. Continuous water temperature, Blackfoot River at Scotty Brown Bridge, 2000... ..	270
Figure 8-40. Average daily water temperature, Blackfoot River from Nevada Creek to Monture Creek	270
Figure 8-41. Upstream to downstream temperature variation, Blackfoot River and tributaries, 2000 and other years as noted.....	272
Figure 8-42. Continuous water temperature, Blackfoot River at Scotty Brown Bridge, 2000... ..	274
Figure 8-43. Continuous water temperature, Cottonwood Creek at the mouth, 2003	275
Figure 8-44. Continuous water temperature, Clearwater River at the mouth, 2003	275
Figure 8-45. Continuous water temperature, Blackfoot River at Corrick River Bend, 2000	276
Figure 8-46. Average daily water temperature, Blackfoot River, Monture Creek to Belmont Creek, June 2000.....	276
Figure 9-2. Current Sediment Loading and Needed Reductions in Nevada Creek by Listed Stream Segment	288

Figure 9-3. Current Sediment Loading and Needed Reductions in the Middle Blackfoot by Listed Stream Segment	288
Figure 9-4. Sediment Reduction Allocations (Tons/Yr) By Contributing Land Use Category for the Nevada Creek and Middle Blackfoot Planning Areas	292
Figure 9-11. Comparison of the Allowable to the Observed Total Phosphorus Load for Nevada Creek Upstream of Nevada Creek Reservoir.....	307
Figure 9-12. Comparison of the Allowable to the Observed Total Phosphorus Load for Nevada Creek Downstream of Nevada Creek Reservoir.....	308
Figure 9-13. Comparison of the Allowable to the Observed Total Phosphorus Load for Nevada Creek at the Mouth.....	309
Figure 9-14. Comparison of the Allowable to the Observed Total Phosphorus Load for Blackfoot River Upstream of Nevada Creek	311
Figure 9-15. Comparison of the Allowable to the Observed Total Phosphorus Load for Blackfoot River at Bonner, MT	311
Figure 9-16. Comparison of the Allowable to the Observed Total Nitrogen Load for Nevada Creek Upstream of Nevada Creek Reservoir.....	313
Figure 9-17. Comparison of the Allowable to the Observed Total Nitrogen Load for Nevada Creek Downstream of Nevada Creek Reservoir.....	314
Figure 9-18. Comparison of the Allowable to the Observed Total Nitrogen Load for Nevada Creek at the Mouth.....	315
Figure 9-19. Comparison of the Allowable to the Observed Total Nitrogen Load for Blackfoot River Upstream of Nevada Creek	317
Figure 9-20. Comparison of the Allowable to the Observed Total Nitrogen Load for Blackfoot River at Bonner, MT	317
